

PartyPoker System Evaluation Certificate

Operator: [PartyGaming](http://www.partygaming.com)

URL: <http://www.partypoker.com>

This is to certify that iTech Labs has evaluated the following games and tournaments for the PartyPoker system and found that they fully comply with the relevant Technical Standards*.

Poker games

- Texas Hold'em (Limit, No limit, Pot Limit)
- Omaha (Limit, Pot Limit)
- Omaha Hi/Lo (Limit, Pot Limit)
- 7 Card Stud (Limit)
- 7 Card Stud Hi/Lo (Limit)
- Sit & Go (Single Table, Multi Table)
- Scheduled Tournaments

Casino games

- Blackjack

The Poker games and Blackjack were previously tested and certified. This included testing the Random Number Generator (RNG) used for card shuffling, verification of game rules and artwork, functional testing, Return To Player calculation (for Blackjack), verification of game outcomes and source code evaluation. iTech Labs has also verified procedures for software integrity. This included change control mechanisms and regular monitoring of critical modules.

The current round of testing included evaluation of all Poker games using the new Poker client. This included evaluation of the new artwork, verification that the games and tournaments are not affected by software changes and they continue to work according to the game rules.

iTech Labs has found that the games and tournaments are fair and the system is reliable and resilient.

* Notes:

1. The relevant AGCC standard are available at <http://www.gamblingcontrol.org/>

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs have conducted a level of testing appropriate for a component test of this type.
